Muquaddim Omisore

Product Designer and Visual Content Strategist · Remote, Nigeria (UTC+1) · Available full time · Time zone flexible

Muquaddimiq@gmail.com · behance.net/muquaddomisore · x.com/MuquaddimIQ

SUMMARY

Product designer and founder of THE IQ SYNAPSE who turns complex ideas into clear, usable visual and written experiences. Combines Figma based UI and UX and information design with hands on community, campaign and growth work across early stage tech and AI driven products, from research through launch.

AVAILABILITY

Available full time for remote roles. Eager to work with teams in other countries and flexible across time zones; time differences are not a barrier.

EXPERIENCE

Founder & Lead UI UX Designer, THE IQ SYNAPSE — Founder

- Founded THE IQ SYNAPSE, now a fully registered business (CAC), to connect dementia patients, their families and their healthcare practitioners.
- Run the whole design system and tokens for a tri node dementia care platform: zero touch kiosk, mobile app and web dashboard.
- Designed purely passive patient interfaces for cognitive decline, with a muted slate blue palette and strict WCAG contrast compliance.
- Designed 55+ screens across the caregiver app (25), the patient node (10+) and the clinician dashboard (20+), shaped by interviews with about 10 people, a UK matron and a Nigerian neurosurgery resident.
- Specified offline resilience with SQLite local caching so the system never shows network errors during residential internet outages.

Designer, STEM Tisha at TechGen Africa — Present

- Designed every graphic on the STEM Tisha Instagram page, for TechGen Africa’s live tutor led coding, AI and product building program for kids aged 5 to 17.
- Help keep the visual identity and learning experience consistent for parents and young builders.

Design Assistant and Community Manager, Hashgraph Online (HOL) — Jan 2026, past role

- Designed graphics and visual assets for social media and community communications.
- Helped translate technical concepts and ecosystem developments into accessible visual content.
- Supported brand consistency across digital materials, keeping designs clear and true to the organisation’s visual identity.
- Created educational and community focused content, visuals and threads explaining emerging topics in AI, Web3 and decentralized technologies.
- Contributed to community initiatives and programs that encouraged collaboration among developers, builders and enthusiasts.
- Shaped narratives around ongoing initiatives and promoted events and spaces for a broader audience.

Brand Identity Designer (Freelance), Zaynab Yahya & Co — Jan 2026 to Present

- Designed the company logo and developed the visual direction of the firm’s brand.
- Created promotional flyers and marketing materials to support visual communication and outreach.
- Focused on typography, colour selection, layout and visual consistency across all promotional materials.

Content Creator & Design Ambassador, Qitmeer Network — Nov 2023 to Feb 2025

- Created visual content and graphics for social media and community platforms.
- Developed educational content explaining blockchain concepts, ecosystem developments and project updates.
- Wrote informative threads and short form content that made technical topics accessible.
- Supported campaigns, announcements and ecosystem initiatives through visual storytelling.

UX Researcher & Beta Tester (AI Product), Sentimex.io Oct to Dec 2024

- Contributed to product design of an AI bot by helping define how it structured and surfaced live data for users.
- Ran structured UX and usability testing ahead of public release, identifying friction points.
- Delivered actionable feedback that directly improved usability and stability.

Social Media & Visual Design Intern, Sentimex.io Oct to Dec 2024

- Designed templates and visual content that grew the Telegram community from 0 to 500+ members in 1 month.
- Designed outreach materials for Key Opinion Leader (KOL) partnerships to drive project visibility.

Community Ambassador & Content Designer, DIMAI Aug 2023 to Jan 2024

- Designed onboarding and awareness content to support new community members.
- Built structured content and feedback loops to keep design and messaging aligned with user needs.

SIDE PROJECTS

NovaOps. AI powered operations platform for automating workflows and managing AI agents (SaaS, UX and UI, web design).

GuardPay. Security first mobile banking concept with Guard Score, Guardian AI, AI Scam Shield and a Smart Spending Coach.
